Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. Claims 1-94 are pending in this application.
2. Examiner acknowledges applicant's response to non-final office action filed on 8/13/2008.
3. Examiner acknowledges applicant's "rule 1.132 declaration by Inventor" filed on 8/13/2008.
4. Claims 73, 82, 84 and 93 have been amended [8/13/2008].

Note: In the specification, page 1, line 16, co-pending US application No. # 10/769,066 updated status required in response to this office action.

Drawings

5. The Drawings filed on 2/27/2004 are acceptable for examination purpose

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 73-94 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims [as amended] 73-94 lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of

chemical compounds to be a composition of matter. As such they fall within a statutory category. They are, at best, functional descriptive material *per se*.

Claim Rejections - 35 USC § 112

7. As to claim 73 [as amended], applicant appear to be invoking 112, sixth paragraph "means for" type language, but it is unclear what "structures" are being used to perform the functions. No particular structures are identified in the specification that would perform the function. It is noted that part of the claim 73 merely directed to "means for associating a frame with each of a number of intervals in a period; "means for identifying first data characteristic.....expected quantity";, while rest of the limitations do not direct to "means for". One of skill in the art would not be apprised of what structures are intended to be encompassed by the claims. Nor would it be clear what the structures are intended to accomplish. It is unclear whether claim 73 is directed to functional or non-functional descriptive language.

Claims 74-83 depend from claim 73 also having similar problem as stated in claim 73 and claims 74-83 are rejected on that basis.

8. As to claim 84 [as amended], applicant appear to be invoking 112, sixth paragraph "means for" type language, but it is unclear what "structures" are being used to perform the functions. No particular structures are identified in the specification that would perform the function. The claim merely directed to "means for associating a

frame with each of a number of intervals in a period; "means for identifying first data characteristic.....". One of skill in the art would not be apprised of what structures are intended to be encompassed by the claims. Nor would it be clear what the structures are intended to accomplish. Further it is also noted that all claim limitations are having "means for...." except limitations "a data mining system configuredintervals"; "a display apparatus....visual characteristic". It is therefore, unclear whether claim 84 is directed to functional or non-functional descriptive language.

Claims 85-94 depend from claim 84 also having similar problem as stated in claim 84 and claims 85-94 are rejected on that basis.

Response to Arguments

9. Examiner noted applicant's remarks at page 24-25, in view of applicant's filed "rule 1.132 declaration by inventor", the rejection under 35 USC 102(a) as set forth in the previous office action is hereby withdrawn. As stated above, examiner maintains 35 USC 101 rejection as set forth in the previous office action because claims 73-94 lack the necessary physical article or objects to constitute a machine or a manufacture within the meaning of 35 USC 101.

Further, in view of applicant's amendment to claims 73,82,84,93, invoking 35 USC 112 6th paragraph, examiner rejected independent claims 73, 84 as stated above, further claims 74-83, 85-94 depend from claims 73,84 are also rejected in the above analysis.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
